IPM statement

It is the goal of Gerber Union Elementary School District to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to:

- Minimize pesticide use on our school campus.
- Achieve long term pest control while maintaining an environment that is safe and healthy for the public.
- use environmental friendly practices as a first option when combating pests.
- Maintain records of pesticides applications to be sent to DPR annually.
